Sonexis Technology, Inc. Solution Now Rated “Avaya Compliant”

FOR IMMEDIATE RELEASE: October 11, 2011

Monroeville, PA — Sonexis Technology, Inc., a leading provider of on-premise audio and web conferencing platforms, today announced that ConferenceManager 10.0 is compliant with a key Internet Protocol (IP) telephony solution from Avaya, a global provider of business collaboration systems, software and services.

Sonexis ConferenceManager is a feature-rich solution, well-suited to the small to medium enterprise (SME), which provides a high quality collaboration environment to customers wanting to implement a secure, cost-effective solution for audio and web conferencing. Through the use of ConferenceManager, SME customers can benefit from the flexibility and enhanced security features offered by the solution and achieve cost savings over traditional conferencing service providers.

The application now is compliance-tested by Avaya for compatibility with: Avaya IP Office Release 7.0 using PRI, SIP, and H.323 trunk interfaces. Avaya IP Office is the company’s flagship communications solution for small and mid-sized businesses.

“Membership in the Avaya DevConnect program will assist Sonexis in delivering a comprehensive and secure collaboration solution for IP Office customers,” said **Dan Watkins, executive vice president with Sonexis**. “The successful testing of ConferenceManager through the DevConnect program provides SME customers with a robust and secure collaboration solution that can be seamlessly deployed within the IP Office ecosystem while preserving existing investments in telephony and data infrastructure. Sonexis is pleased to provide Avaya customers with another option for enhanced audio and web collaboration.”

As a Gold member of the program, Sonexis Technology, Inc. is eligible to submit products for compatibility testing by the Avaya Solution Interoperability and Test Lab. There, a team of Avaya engineers develops a comprehensive test plan for each application to verify whether it is Avaya compliant. Doing so enables businesses to confidently add best-in-class capabilities to their network without having to replace their existing infrastructure—speeding deployment of new applications and reducing both network complexity and implementation costs.

“Sonexis Technology’s collaboration offering for the small-to-medium size enterprise marketplace leverages the built-in audio conferencing capabilities of Avaya IP Office and will provide greater capability and choice for Avaya IP Office customers,” **said Eric Rossman, vice president, developer relations, Avaya.** “We are pleased to add Sonexis ConferenceManager to our portfolio of DevConnect compliance-tested products as another option available to our IP Office customers for audio and web collaboration.”
