Sonexis Technology, Inc. Selected for Membership in Avaya DevConnect Program

Network of companies creates innovative, IP-enabled Unified Communications applications that extend the value of multivendor networks

For Immediate Release: April 28, 2011

Monroeville, PA – Sonexis Technology, Inc., a leading provider of on-premise audio and web conferencing platforms, today announced it has been selected by Avaya Inc., a global leader in business collaboration systems, software and services, for membership in the Avaya DevConnect program focusing on Avaya's flagship small to medium enterprise solution, Avaya IP Office.

Sonexis delivers a feature-rich collaboration solution well-suited for the small to medium enterprise (SME). Sonexis ConferenceManager provides a high quality collaboration environment to customers looking to implement a secure, cost-effective solution for audio and web conferencing. As a result, SME customers gain more flexibility and cost savings over traditional conferencing service providers, and benefit from enhanced security features that are inherent in the platform.

The Avaya DevConnect program promotes the development, compliance-testing and co-marketing of innovative third-party products that are compatible with standards-based Avaya solutions. Member organizations have expertise in a broad range of technologies – including IP telephony, contact centers and mobility applications – helping companies extend the value of multivendor networks and transform voice into an intelligent business application that delivers true value to the bottom line.

"Membership in Avaya's developer community helps Sonexis deliver a comprehensive and secure collaboration solution to IP Office customers," said Dan Watkins, Executive Vice President with Sonexis. "ConferenceManager offers a robust and secure collaboration solution that can be seamlessly deployed to customers that require an expanded collaboration solution while preserving prior investments in telephony and data infrastructure. The testing of the ConferenceManager solution with Avaya IP Office through the DevConnect program will provide Avaya customers with another option for enhanced audio and web collaboration."

The Avaya DevConnect program currently includes thousands of software and hardware developer companies, integrators, service providers and customers. Members have created a broad array of innovative solutions tested for Avaya compliance, including natural language speech recognition applications, wireless services, specialized computer telephony integration and reporting capabilities, and applications tailored for specific vertical industries. Through the DevConnect program, Avaya provides a number of platforms and interfaces for member companies to develop with and enhance.

"We welcome Sonexis Technology to the Avaya DevConnect community of development partners." said Eric Rossman, Vice President, Developer Relations, Avaya. "Sonexis Technology's collaboration offering for the small-to-medium size enterprise marketplace will provide greater capability and choice for Avaya IP Office customers."

As a member of the DevConnect program, companies have access to a wide range of support from Avaya, including technical resources and training. There are three levels of membership – Registered, Gold and Platinum – each entailing progressive levels of marketing and sales involvement. Free Registered membership is available to anyone interested in designing Avaya-compatible solutions. Gold-level members and Platinum members must meet rigorous Avaya criteria for customer satisfaction, product support, business operations, marketing and sales. Sonexis Technology, Inc. is a Gold member of the Avaya DevConnect program.

Membership information and a listing of solutions developed and tested under the DevConnect program are available at www.avaya.com/devconnect.
