PRESS RELEASE

Sonexis Announces Release 10.0 of ConferenceManager™

Sonexis ConferenceManager platform provides enhanced collaboration solutions

Monroeville, PA, September 21, 2011: **Sonexis Technology, Inc.** announces the general availability of ConferenceManager 10.0, a leading on-premise audio and web conferencing solution for the enterprise. This release is the latest within the Sonexis flagship conferencing platform and includes multiple security enhancements, is JITC Approved for Department of Defense DISA implementations, and many other new features.

“The ConferenceManager 10.0 release is another example of our commitment to providing our customers with a long term solution to conferencing and collaboration,” explained Dan Watkins, Executive Vice President with Sonexis. “The Unified Communications environment is poised to become the successful collaboration template for the enterprise. ConferenceManager 10.0 is engineered to be the solution that fits into today’s technology environment and is optimized for emerging trends in Unified Communications.”

ConferenceManager 10.0 provides a secure, easy-to-administer, and cost effective alternative to the spiraling costs associated with public cloud collaboration. By offering audio and web conferencing within a single platform, Sonexis provides a best-of-breed conferencing solution to meet the needs of an evolving Unified Communications landscape.

Designed to work within any existing voice or data network, ConferenceManager 10.0 preserves the existing infrastructure investments and scales easily from as little as 12 to 600-ports/seats allowing customers to add capacity, protocols, or features simply by applying a new software license key. ConferenceManager 10.0 provides unparalleled flexibility, allowing customers to buy what they need when they need it.
